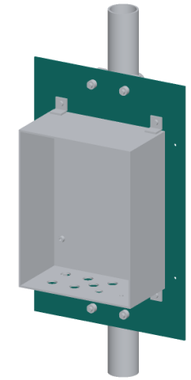
Scale 1:5; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 270 x 420 mm, 3 mm aluminium. Front view: the face the box sits on.
Heights from the bottom edge; sideways from the centre line.
U-bolt holes 9 mm at 29 each side, 25 and 395 up (two U-bolts).
Lug screw holes 5.5 mm at 85 each side, 67 and 353 up.
Shield screws: drill 4.2 mm and tap M5 at 117.5 each side,
100 and 320 up (or fit M5 rivet nuts in 7 mm holes).
The box sits centred, from 80 to 340 up; mark its outline.
Deburr every hole and edge; round the corners to about 3 mm.
Fit: the box's back flat on the front face, held by four lugs;
two V-saddles flat on the back face, one at each U-bolt.
Check: lay the lugs and saddles on it and look through each hole.
